In Q4 2024, the Company's total profit after tax was modest at VND33.5 billion, a decrease of VND19 billion (-36.1%) from Q4 2023. Adverse market conditions and a subsequent drop in overall trading volume have resulted in lower revenue and profits. In which:

+ The realized profit in the period fell by VND14.8 billion (-29.3%) from the previous period due to realized revenue dropping by VND74.7 billion (-24.4%) and incurred expenses falling by VND59.9 billion (-23.5%).

+ The unrealized profit for this period also decreased by VND7 billion (-77.8%) due to a decrease of VND7 billion in the revaluation gain on FVTPL financial assets for this quarter.

The aforementioned factors account for the difference in the Q4 2024 business performance compared to the same period in 2023 at Bao Viet Securities Joint Stock Company.

We present this report to your honorable organizations. With our sincere regards./.
