Profit after corporate income tax for Q4/2024 was 2,640 billion VND, a decrease compared to the same period last year of 2,441 billion VND.

The main reasons are as follows:

In 2024, the global context remained unpredictable, with escalating conflicts in many regions, slow recovery in economic trade, climate change, and complex regional security status... Besides solving the large inventory from previous years, under the decisive guidance of the Board of Management, numerous positive innovations in management activities, improved competitive capability, product diversification, increased labor productivity, and efforts to source sustainable materials... throughout the system—from yarn, weaving, dyeing, to garment production—have resulted in overall stable efficiency for the Company.

Sincerely./.
