(The explaining of changes in profit
after CIT in the mid-year consolidated
Financial Statements for the first quarter
of 2025 and the first quarter of 2024)

To: - HANOI STOCK EXCHANGE

Based on the information disclosure regulations for listed organizations on the stock market, Central Container Joint Stock Company (Stock code: VSM) would like to provide an explanation regarding the fluctuation of Profit after CIT in the mid-year consolidated income statement for the first quarter of 2025, which has changed by 10% or more compared to the same period in 2024, as follows:

Item	First quarter of 2025	First quarter of 2024	Spread increase (+)/decrease (-)	Increase rate (%)
Profit after CIT	3.021.737.609	2.523.386.782	498.350.827	20%

*** Reasons:**

In the first quarter of 2025, the Company recorded a decline in container transport and handling volume through its depot. However, the volumes of container agency services and freight forwarding (FWD) experienced a significant increase compared to the same period in 2024. This is the main reason why the profit after tax on the mid-year consolidated financial statements in the first quarter of 2025 increased compared to the same period in 2024.

The above is the main reason for the difference in profit after CIT in the mid-year consolidated income statement for the first quarter of 2025 compared to the same period last year. Our company would like to explain to the Hanoi Stock Exchange.

Thank you very much!
