1 GENERAL INFORMATION (continued)

- (i) According to the unconditional and irrevocable voting proxies dated 27 December 2021, two shareholders of Clean Energy Vision Development Joint Stock Company transferred 9.72% of their voting rights to the Company. As a result, the Company holds 51% of the voting rights in this company.

As at 31 March 2025, the Company had 72 employees (as at 31 December 2024: 74 employees).

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**2.1 Basic of preparation of separate financial statements**

The separate financial statements have been prepared in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of separate financial statements. The separate financial statements have been prepared under the historical cost convention.

The accompanying separate financial statements are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam. The accounting principles and practices utilised in Vietnam may differ from those generally accepted in countries and jurisdictions other than Vietnam.

The separate financial statements in the Vietnamese language are the official statutory financial statements of the Company. The separate financial statements in the English language have been translated from the Vietnamese version.

Separately, the Company has also prepared consolidated financial statements of the Company and its subsidiaries (together, "the Group") in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of consolidated financial statements. In the consolidated financial statements, subsidiary undertakings, which are those companies over which the Group has the power to govern the financial and operating policies, have been fully consolidated.

Users of these separate financial statements of the Company should read them together with the consolidated financial statements of the Group for the year ended 31 March 2025 in order to obtain full information of the consolidated financial position and consolidated results of operations and consolidated cash flows of the Group.

2.2 Fiscal year

The Company's fiscal year is from 1 January to 31 December.

2.3 Currency

The separate financial statements are measured and presented in the Vietnamese Dong ("VND" or "Dong"), which is the Company's accounting currency.

2.4 Exchange rates

Transactions arising in foreign currencies are translated at the exchange rates prevailing at the transaction dates. Foreign exchange differences arising from these translations are recognised in the separate income statement.

Monetary assets and liabilities denominated in foreign currencies at the separate balance sheet date are respectively translated at the buying and selling exchange rates at the separate balance sheet date of the commercial banks with which the Company regularly transacts. Foreign currencies deposited in banks at the separate balance sheet date are translated at the buying exchange rate of the commercial banks where the Company opens its foreign currency accounts. Foreign exchange differences arising from these translations are recognised in the separate income statement.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.5 Cash**

Cash comprises cash at bank.

2.6 Receivables

Receivables represent trade receivables from customers arising from sales of goods and rendering of services or non-trade receivables from others and are stated at cost. Provision for doubtful debts is made for each outstanding amount based on overdue days in payment according to the initial payment commitment (exclusive of the payment rescheduling between parties), or based on the estimated loss that may arise. The difference between the provision of this period and the provision of the previous period is recognised as an increase or decrease of general and administrative expenses in the period. Bad debts are written off when identified as uncollectible.

Receivables are classified into long-term and short-term receivables on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

2.7 Investments**(a) Trading securities**

Trading securities are other financial instruments, which are held for trading to earn profits.

Trading securities are initially recorded at historical cost including cost of acquisition and any expenditure that is directly attributable to the acquisition. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the year end. The provision for diminution in value of trading securities is made when their carrying value is higher than their market value. Changes in the provision balance during the fiscal year are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

The time of recording trading securities is the time when the Company officially has ownership in accordance with the provisions of law.

Profit or loss from liquidation or disposal of trading securities is recognised in the separated income statement. The costs of trading securities disposed of are determined by using the moving weighted average method.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.7 Investments (continued)****(b) Investments held to maturity**

Investments held to maturity are investments which the Company has a positive intention and ability to hold until maturity.

Investments held to maturity include term deposits at banks. Those investments are initially accounted for at cost. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

Provision for diminution in value of investments held to maturity is made when there is evidence that the investment is uncollectible in whole or in part. Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

Investments held to maturity are classified into short-term and long-term investments held to maturity on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

(c) Investments in subsidiaries

Subsidiaries are all entities whose financial and operating policies the Company has the power to govern in order to gain future benefits from their activities generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

Investments in subsidiaries are initially recorded at cost of acquisition plus other expenditures directly attributable to the investment. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.7 Investments (continued)****(d) Investments in associates and joint venture**

A joint venture is a contractual agreement by two or more parties to jointly conduct an economic activity, which is jointly controlled by the joint venture capital partners. Associates are investments that the Company has significant influence but not control over and the Company would generally have from 20% to less than 50% of the voting rights of the investee.

Investments in associates and joint venture are initially recorded at cost of acquisition including purchase cost or capital contribution value plus other expenditures directly attributable to the investment. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

(e) Investments in other entities

Investments in other entities are investments in equity instruments of other entities without controlling rights or co-controlling rights, or without significant influence over the investee. These investments are accounted for initially at cost. Subsequently, the Board of Management reviews all outstanding investments to determine the amount of provision to recognise at the period end.

(f) Provision for investments in subsidiaries, associates and joint venture, and other entities

Provision for investments in subsidiaries, associates and joint venture, and other entities is made when there is a diminution in value of the investments at the period end.

Provision for investments in subsidiaries, associates and joint venture is calculated based on the loss of investees.

Provision for investments in other entities is calculated based on market value if market value can be determined reliably. If market value cannot be determined reliably, the provision is calculated similarly to provision for investments in subsidiaries, associates and joint venture.

Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.8 Business cooperation contract**

A business cooperation contract ("BCC") is a contract between the Company and other parties to carry out specific business activities without establishing a new legal entity. These activities are controlled by one of the parties under the BCC. The BCC is based on shares of pre-tax profits. The parties in a BCC may agree to share profits after tax.

A BCC in the form of shares of after tax profits is controlled by one party, in which:

- (i) If a BCC states that each party is entitled to a fixed amount of profit regardless of the performance of the BCC, it is a lease of asset in substance.
- (ii) If the BCC states that each party is entitled to profits when the BCC is profitable and is required to bear losses when the BCC is loss making, in substance, the BCC parties share revenue and expenses because each party can jointly control the operation and cash flows of the BCC.
- (iii) When the Company is in charge of accounting and tax finalisation, the Company is required to recognise the entire revenue and expenses arising from the BCC, and then allocate the proportionate shares of revenue and expenses to the other parties in the period.
- (iv) When the Company is not in charge of accounting and tax finalisation, the Company accounts for its proportionate share of revenue and expenses from the BCC.

2.9 Lendings

Lendings are lendings granted for the earning interest under agreements among parties but not for being traded as securities.

Lendings are initially recognised at cost. Subsequently, the Board of Management reviews all outstanding amounts to determine the amount of provision to recognise at the period end. Provision for doubtful lendings is made for each lending based on overdue days in payment of principals according to the initial payment commitment (exclusive of the payment rescheduling between parties) or based on the estimated loss that may arise. Changes in the provision balance during the accounting period are recorded as an increase or decrease in financial expenses. A reversal, if any, is made only to the extent the investment is restored to its original cost.

Lendings are classified into short-term and long-term lendings on the separate balance sheet based on the remaining term of the lendings as at the separate balance sheet date.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.10 Fixed assets***Tangible fixed assets*

Fixed assets are stated at historical cost less accumulated depreciation or amortisation. Historical cost includes any expenditure that is directly attributable to the acquisition of the fixed assets bringing them to suitable conditions for their intended use. Expenditure which is incurred subsequently and has resulted in an increase in the future economic benefits expected to be obtained from the use of fixed assets, can be capitalised as an additional historical cost. Otherwise, such expenditure is charged to the separate income statement when incurred in the period.

Depreciation

Fixed assets are depreciated and amortised using the straight-line basis so as to write off the depreciable amount of the fixed assets over their estimated useful lives. Depreciable amount equals to the historical cost of fixed assets recorded in the separate financial statements minus (-) the estimated disposal value of such assets. The estimated useful lives of each asset class are as follows:

Machinery	3 - 5 years
Motor vehicles	9 - 10 years
Office equipment	2 years

Disposals

Gains or losses on disposals are determined by comparing net disposal proceeds with the carrying amount of the fixed assets and are recognised as income or expense in the separate income statement.

Construction in progress

Construction in progress represents the cost of assets in the course of installation or construction for production, rental or administrative purposes, or for purposes not yet determined, which are recorded at cost and are comprised of such necessary costs to construct, repair and maintain, upgrade, renew or equip the projects with technologies as construction costs; costs of tools and equipment; compensation and resettlement costs; project management expenditure; construction consulting expenditure; and capitalised borrowing costs for qualifying assets in accordance with the Company's accounting policies. Depreciation of these assets, on the same basis as other fixed assets, commences when they are ready for their intended use.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.11 Leased assets**

Leases of property, plant and equipment where the lessor has transferred the ownership at the end of the lease period, and transferred substantially the risks and rewards, are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of leased assets or the present value of the minimum lease payments.

2.12 Prepaid expenses

Prepaid expenses include short-term and long-term prepayments on the separate balance sheet. Short-term prepaid expenses represent prepayments for services; or tools that do not meet the recognition criteria for fixed assets for a period not exceeding 12 months or a business cycle from the date of prepayment. Long-term prepaid expenses represent prepayments for services; or tools, which do not meet the recognition criteria for fixed assets for a period exceeding 12 months or more than one business cycle from the date of prepayment. Prepaid expenses are recorded at historical cost and allocated on a straight-line basis over their estimated useful lives.

2.13 Payables

Classifications of payables are based on their nature as follows:

- Trade accounts payable are trade payables arising from purchases of goods and services; and
- Other payables are non-trade payables and payables not relating to purchases of goods and services.

Payables are classified into short-term and long-term payables on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

2.14 Borrowings

Borrowings include borrowings from related parties and other parties.

Borrowings are classified into short-term and long-term borrowings on the separate balance sheet based on the remaining period from the separate balance sheet date to the maturity date.

Borrowing costs are recognised in the separate income statement when incurred.

2.15 Accrued expenses

Accrued expenses include liabilities for goods and services received in the period but not yet paid for, due to pending invoices or insufficient records and documents. Accrued expenses are recorded as expenses in the reporting period.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.16 Provisions**

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provision is not recognised for future operating losses.

Provisions are measured at the level of the expenditures expected to be required to settle the obligation. If the time value of money is material, provision will be measured at the present value using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as a financial expense. Changes in the provision balance during the accounting period are recorded as an increase or decrease in operating expenses.

2.17 Capital

Owner's capital is recorded according to the actual amounts contributed and is recorded according to the par value of the shares.

Undistributed earnings record the Company's result after CIT at the reporting date.

2.18 Appropriation of net profit

The Company's dividends are recognised as a liability in separate financial statements in the period based on the announcement date of the Board of Directors in which the dividends are approved by the General Meeting of Shareholders.

Net profit after CIT could be distributed to shareholders after approval at General Meeting of Shareholders, and after appropriation to other funds in accordance with the Company's charter and Vietnamese regulations.

2.19 Revenue recognition**(a) Revenue from rendering of services**

Revenue from rendering of services is recognised in the separate income statement when the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Revenue from the rendering of services is only recognised when the four (4) of the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The percentage of completion of the transaction at the separate balance sheet date can be measured reliably; and
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.19 Revenue recognition (continued)****(b) Interest income**

Interest income is recognised on the basis of the actual time and interest rates for each period when both (2) of the following conditions are satisfied:

- It is probable that economic benefits associated with the transaction will flow to the Company; and
- Income can be measured reliably.

Income from dividends is recognised when the Company has established receiving rights from investees.

(c) Dividends income

Income from dividends is recognised when both (2) of the following conditions are satisfied:

- It is probable that economic benefits associated with the transaction will flow to the Company; and
- Income can be measured reliably.

Income from dividends is recognised when the Company has established receiving rights from investees.

2.20 Cost of services rendered

Cost of services rendered are the cost of merchandise or services rendered during the period and recorded on the basis of matching with revenue and on a prudent basis.

2.21 Financial expenses

Financial expenses are expenses incurred in the period for financial activities including expenses or losses relating to financial investment activities; interest loans, bond; financial investment provision; other financial expenses.

2.22 General and administration expenses

General and administration expenses represent expenses that are incurred for administrative purposes.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.23 Current and deferred income tax**

Income tax includes all income tax which is based on taxable profits. Income tax expense comprises current income tax expense and deferred income tax expense.

Current income tax is the amount of income tax payable or recoverable in respect of the current period taxable profits at the current period tax rates. Current and deferred income tax are recognised as an income or an expense and included in the profit or loss of the period, except to the extent that the income tax arises from a transaction or event which is recognised, in the same or a different period, directly in equity.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the separate financial statements. Deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of occurrence affects neither the accounting nor the taxable profit or loss. Deferred income tax is determined at the tax rates that are expected to apply to the financial year when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the separate balance sheet date.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

2.24 Related parties

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with the Company, including holding companies, subsidiaries and fellow subsidiaries are related parties of the Company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the Company, key management personnel, including the Board of Directors, Board of Management of the Company and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering its relationships with each related party, the Company considers the substance of the relationships not merely the legal form.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**2.25 Segment reporting**

A segment is a component which can be separated by the Company engaged in sales of goods or rendering of services ("business segment"), or sales of goods or rendering of services within a particular economic environment ("geographical segment"). Each segment is subject to risks and returns that are different from those of other segments. A reportable segment is the Company's business segment or the Company's geographical segment.

2.26 Critical accounting estimates

The preparation of separate financial statements in accordance with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting System and applicable regulations on preparation and presentation of separate financial statements requires the Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the separate financial statements and the reported amounts of revenues and expenses during the accounting period.

Such estimates and assumptions are continually evaluated. They are based on historical experiences and other factors, including expectations of future events that may have a financial impact on the Company and that are assessed by the Board of Management to be reasonable under the circumstances.
