3.1. Applied accounting standards and system

The accounting regulation and guidance applicable to securities companies as set out in Circular No. 210/2014/TT-BTC dated 30 December 2014, Circular No.334/2016/TT-BTC dated 27 December 2016 by the Ministry of Finance amending, supplementing and replacing Appendix No. 02 and Appendix No. 04 of Circular No. 210/2014/TT-BTC, and other Vietnamese Accounting Standards promulgated by the Ministry of Finance as per:

- ▶ Decision No. 149/2001/QĐ-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Standards on Accounting (Series 1);
- ▶ Decision No. 165/2002/QĐ-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 2);
- ▶ Decision No. 234/2003/QĐ-BTC dated 30 December 2003 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 3);
- ▶ Decision No. 12/2005/QĐ-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Standards on Accounting (Series 4); and
- ▶ Decision No. 100/2005/QĐ-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Standards on Accounting (Series 5).

3.2. Statement on compliance with accounting standards and systems

Implement the Company's accounting on the basis of compliance with Vietnamese Enterprise Accounting System, the accounting regulation and guidance applicable to securities companies as set out in Circular No. 210/2014/TT-BTC dated 30 December 2014, Circular No.334/2016/TT-BTC dated 27 December 2016 issued by the Ministry of Finance.

3.3 Applied accounting documentation system: is the General Journal Voucher system

4 Summary of significant accounting policies:

4.1 Principles for recording cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of three months or less that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

Cash deposited by customers for securities trading and cash deposited by securities issuers are presented on the off-balance sheet.

4.2. Principles and methods of accounting for financial assets at fair value through profit and loss (FVTPL), Held-to-maturity investments (HTM), Loans.

4.2.1 Principles for financial assets' classification

- According to Circular 210/2014/TT-BTC and Circular 334/2016/TT-BTC stipulating: Financial assets recorded through profit/loss, holdings to maturity, assets ready for sale in the list of financial assets of the Company are classified according to the following financial asset groups: Stocks, bonds, money market instruments, derivatives,... and in the form of trading: Trading through the stock exchange or not through the stock exchange (OTC). For OTC trading, including financial assets to be listed, other financial assets. In each type of financial asset, the financial assets are arranged according to the reputation, safety level and degree of restriction of the type of financial asset in which the Company is invested.

- For loans: In accordance with the current law, the Company may lend money to customers to buy securities in accordance with the regulations on securities margin trading under margin contracts. Circular 210/2014/TT-BTC clearly stipulates that the Company classifies loans by qualitative or quantitative methods – depending on the purpose of management.

4.2.2 Principle of recognition:

4.2.2.1 Financial assets at fair value through profit and loss (FVTPL)

Financial assets at FVTPL are financial assets that satisfy either of the following conditions:

- a) It is classified as held for trading. A financial asset is classified as held for trading if:
 - It is acquired or incurred principally for the purpose of selling or repurchasing it in the short term;
 - There is evidence of a recent actual pattern of short-term profit-taking; or
 - It is a derivative (except derivative that is a financial guarantee contract or effective hedging instrument)

- b) Upon initial recognition, a financial asset is designated by the entity as at fair value through profit and loss as it meets one of the following criteria:
- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the asset or recognizing gains or losses on a different basis; or
 - The assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with the company's risk management policy or investment strategy.
 - Financial assets at FVTPL are initially recognized at cost (acquisition cost of the assets excluding transaction cost arising from the purchase) and subsequently recognized at fair value.

Increase in the difference arising from revaluation of financial assets at FVTPL in comparison with the previous period is recognized into the income statement under "*Gain from revaluation of financial assets at FVTPL*". Decrease in the difference arising from revaluation of financial assets at FVTPL in comparison with the previous period is recognized into the income statement under "*Loss from revaluation of financial assets at FVTPL*".

Transaction costs relating to the purchase of the financial assets at FVTPL are recognized when incurred as expenses in the income statement.

4.2.2.2. Held-to-maturity investments (HTM)

HTM investments are non-derivative financial assets with determinable or fixed payments and fixed maturity that an entity has the positive intention and ability to hold to maturity other than:

- a) Those that the entity upon initial recognition designates as at FVTPL;
- b) Those that the entity designates as AFS;
- c) Those that meet the definition of loans and receivables.

HTM investments are recognized initially at cost (assets' acquisition cost plus (+) transaction costs which are directly attributable to the investments such as brokerage fee, trading fee, issuance agent fee and banking transaction fee). After initial recognition, HTM investments are subsequently measured at amortized cost using the effective interest method.

Amortized cost of HTM investments is the amount at which the financial asset is measured at initial recognition minus (-) principal repayments, plus (+) or minus (-) the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and minus (-) any reduction for impairment or uncollectible (if any).

The effective interest rate method is a method of calculating the cost allocation on interest income or interest expense in the period of a financial assets or a group of HTM investments.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or liabilities.

HTM investments are subject to an assessment of impairment at the interim financial statement date. Provision is made for an HTM investment when there is any objective evidence that the investment is unrecoverable or there is uncertainty of recoverability, resulting from one or more events that has occurred after the initial recognition of the investment and that event has an impact on the estimated future cash flows of the investment that can be reliably estimated. Evidence of impairment may include a drop in the fair value/market value of debt, indications that the debtors or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicates that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults. When there is any evidence of impairment, provision for an HTM investment is determined as the negative difference between its fair value and amortized cost at the assessment date. Any increase/decrease in the balance of provision is recognized in the income statement under *“Provision expense for diminution in value and impairment of financial assets and doubtful receivables and borrowing costs of loans”*.

4.2.2.3 Loans

Loans are non-derivative financial assets with fixed or identifiable payments and not listed on the market, with the exceptions of:

- a) The amounts the Company has the intent to immediately sell or will sell in a near future, which are classified as assets held for trading, and like those which, upon initial recognition, the company categorized as such recognized at fair value through profit or loss;
- b) The amounts categorized by the Company as available for sale upon initial recognition; or
- c) The amounts whose holders cannot recover most of the initial investment value not due to credit quality impairment and which are categorized as available for sale.

Loans are recognized initially at cost. After initial recognition, loans shall be measured at amortized cost using the effective interest rate.

Amortized cost of loans is the amount at which the financial asset is measured at initial recognition minus principal repayments, plus (+) or minus (-) the cumulative amortization using the effective

interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or uncollectible (if any).

Margin lending

Margin lending is the investors' use of credit limits granted by the Company for the purposes of securities investment, pledged by cash or securities purchased. Margin is recognized initially at cost. After initial recognition, margin shall be still measured at cost and be assessed for impairment (if any).

Loans are subject to an assessment of impairment at the interim financial statement date. Provision is made for loan based on its estimated loss which is determined by the negative difference between the market value of securities used as collaterals for such loan and the loan balance. Any increase/decrease in the balance of provision is recognized in the interim income statement under "*Provision expense for diminution in value and impairment of financial assets and doubtful receivables and borrowing costs of loans*".

4.2.2.4 Available-for-sale financial assets (AFS)

AFS financial assets are non-derivative financial assets which are designated as AFS or are not classified as:

- a) Loans and receivables;
- b) HTM investments;
- c) Financial assets at FVTPL.

AFS financial assets are recognized initially at cost (purchase price plus (+) transaction costs which are directly attributable to the purchase of the financial assets). After initial recognition, AFS financial assets are subsequently measured at fair value, except when fair value can not be determined reliably. In that case, AFS financial assets will continue to be accounted at cost.

Difference arising from the revaluation of AFS financial assets in comparison with previous period is recognized under "*Gain/(loss) from revaluation of AFS financial assets*" in "*Other comprehensive income*" which is a part of the income statement.

As at the interim financial statement date, the Company assessed whether there is any objective evidence that an AFS financial asset is impaired. Any increase/decrease in the balance of provision is recognized in the interim income statement under "*Provision expenses for diminution in value and impairment of financial assets and doubtful debts and borrowing costs of loans*".

- When a debt instrument is classified as available-for-sale, the assessment of impairment is conducted using the same criteria as those applied for HTM investments. When there is any

evidence of impairment, provision for an AFS asset is determined as the negative difference between its fair value and amortized cost at the assessment date.

- When an equity instrument is classified as available-for-sale, evidence of impairment includes a significant or prolonged decline in the fair value of the investment below its original cost. ‘Significant’ is to be evaluated against the original cost of the asset and ‘prolonged’ indicates the period in which the fair value has been below its original cost. When any evidence of impairment exists, provision is determined as the difference between the AFS asset’s cost and fair value at the assessment date.

4.2.2.5 Fair value measurement

Fair value/market value of the securities is determined as follows:

- For securities listed on Hanoi Stock Exchange and Ho Chi Minh City Stock Exchange, their market prices are their closing prices on the trading day preceding the date of setting up the revaluation.
- For unlisted securities registered for trading on UpCom, their market prices are the average price within the last 30 transaction days before the time of setting up the provision.
- For the delisted securities and suspended trading securities from the sixth day afterward, their prices are the book value at the latest financial report date.
- The market price for unlisted securities and securities unregistered for trading used as a basis for setting up the provision is the average of actual trading prices quoted by three (03) securities companies conducting transactions at the latest date within one month preceding the revaluation date.

For securities which do not have reference price from the above sources, the revaluation is determined based on the financial performance and the book value of securities issuers as at the assessment date.

For the purpose of determining CIT taxable profit, the tax base for financial assets is determined by cost minus (-) provision for diminution in value. Accordingly, market value of securities for provision purpose is determined in accordance with the Circular No.48/2019/TT-BTC dated 8 August 2019 (“Circular 48”) and Circular No. 24/2022/TT-BTC dated 07 April 2022 (Circular No.24) amends and supplements a number of articles of Circular 48.

4.2.2.6 Principles and methods for reclassification of financial assets

Reclassification when selling financial assets other than FVTPL

When selling financial assets other than FVTPL, securities companies are required to reclassify those financial assets to financial assets at FVTPL. The difference arising from the revaluation of financial assets AFS, which is recognized in “Gain/(loss) from revaluation of financial assets AFS” will be recognized as corresponding revenue or expenses at the date of reclassification of financial assets AFS for selling purpose.

Reclassification due to change in purpose or ability to hold

Securities companies are required to reclassify financial assets to their applicable categories if their purpose or ability to hold has changed, consequently:

- Non-derivative financial assets at FVTPL that are not required to classify as financial asset at FVTPL at the initial recognition can be classified as loans and receivables in some special cases or as cash and cash equivalents if the requirements are met. The gains or losses arising from revaluation of financial assets at FVTPL prior to the reclassification are not allowed to be reversed.
- Due to changes in purposes or ability to hold, some HTM investments are required to be reclassified into AFS financial assets and measured at fair value. The difference arising from revaluation between carrying value and fair value are recognized under “Gain/loss from revaluation of assets at fair value” in Owners’ equity.

4.3 Principles and methods of recording receivables

- Receivables are initially recorded at cost and subsequently always presented at cost.
- Receivables are subject to review for impairment based on their overdue status or estimated loss arising from undue debts of corporate debtors who have bankruptcy or are under liquidation; or of individual debtors who are missing, have fled, are prosecuted, detained or tried by law enforcement bodies, are serving sentences or have deceased. Increases or decreases to the allowance balance are recorded as “General and administrative expenses” in the interim income statement.
- For overdue receivables, the level of provision under the guidance of Circular No. 48/2019/TT-BTC issued by the Ministry of Finance on 08 August 2019 and Circular 24/2022/TT/- BTC issued by the Ministry of Finance on 07 April 2022 is as follows:

<u>Overdue period</u>	<u>Allowance rate</u>
From over six (06) months to less than one (01) year	30%
From one (01) year to less than two (02) years	50%
From two (02) years to less than three (03) years	70%
From three (03) years and above	100%

4.4 Principles for recording the sale and repurchase agreements

Securities sold under the agreements to be repurchased at a specified future date (“repo”) are not derecognized from the interim statement of financial position. The corresponding cash received is recognized in the interim statement of financial position as a liability. The difference between sale price and repurchase price is treated as interest expense and is accrued over the life of the agreement using the straight-line method.

4.5 Principles for recording fixed assets

Fixed assets are stated at cost less accumulated depreciation/amortization.

The cost of a fixed asset comprises of its purchase price and any directly attributable costs of bringing the fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the interim income statement as incurred.

When fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the interim income statement.

4.6 Principles of depreciation and amortization:

Depreciation and amortization of tangible fixed assets and intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Machinery and equipment	03 - 08 years
Means of transportation	06 - 08 years
Office equipment	03 - 05 years
Computer Software	03 - 05 years
Others	03 - 05 years

4.7 Principles for recording leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

Rentals under operating leases are charged to the interim income statement on a straight-line basis over the lease term.

4.8 Principles for recording prepaid expenses

Prepaid expenses, including short-term prepaid expenses and long-term prepaid expenses in the statement of financial position, are amortized over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses.

The following types of expenses are recorded as long-term prepaid expense and are amortized over the period of one (01) to five (05) years to the interim income statement:

- ▶ Expenses for office renovation;
- ▶ Office rental fees; and
- ▶ Office equipment.

4.9. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding trade discount, rebate, and sales return. The following specific recognition criteria must also be met before revenue is recognized:

Revenue from brokerage services

Where the contract outcome can be reliably measured, revenue is recognized by reference to the stage of completion. Where the contract outcome cannot be reliably measured, revenue is recognized only to the extent of the expenses recognized which are recoverable.

Revenue from trading of securities: Revenue from trading of securities is determined by the difference between the selling price and the weighted average cost of securities sold.

Other income: Revenues from irregular activities other than revenue-generating activities are recorded to other incomes as stipulated by VAS 14 – “Revenue and other income”, including: Revenues from asset liquidation and sale; fines paid by customers for their contract breaches; collected insurance compensation; collected debt which had been written off and included in the preceding year expenses; payable debts which are now recorded as revenue increase as their owners no longer exist; collected tax amounts which now are reduced and reimbursed; and other revenues.

Interest income: Revenue is recognized on accrual basis (taking into account the effective yield on the asset) unless collectability is in doubt.

Dividends: Revenue is recognized when the Company's entitlement to receive the dividend is established. Stocks dividend received are not recognized as revenue and the respective increase in the number of shares is updated in the total shares held.

Other revenues from rendering services: Where the contract outcome can be reliably measured, revenue is recognized by reference to the stage of completion.

Where the contract outcome cannot be reliably measured, revenue is recognized only to the extent of the expenses recognized which are recoverable.

4.10 Borrowing costs

Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds.

Borrowing costs are recognized as expenses incurred during the period, except for those capitalized as described in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction, or formation of a particular asset that take a sufficiently long time to be ready for its intended use or sale are capitalized as part of the cost of the respective asset.

4.11 Cost of securities sold

The company applies weighted average method on the preceding day to calculate cost of equity securities sold and weighted average method to calculate cost of debt securities sold.

4.12 Corporate Income Tax

** Current income tax*

- Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the reporting date.
- Current income tax is charged or credited to the interim income statement, except when it relates to items recognized directly to equity, in which case the current income tax is also dealt with in owners' equity.
- Current income tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when the Company intends to settle its current tax assets and liabilities on a net basis.

* *Deferred tax:* Deferred tax is provided using the liability method on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction affects neither the accounting profit nor taxable profit or loss.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profits will be available against which deductible temporary differences, carry forward of unused tax credits and unused tax losses can be utilized, except where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Previously unrecognized deferred tax assets are re-assessed at each balance sheet date and are recognized to the extent that it has become probable that taxable profit will allow the deferred tax assets to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the financial period when the asset realized, or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the interim income statement, except when it relates to items recognized directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxable entity and the same taxation authorities and the Company intends to settle its current tax assets and liabilities on a net basis.

4.13 Owners' equity

Contributed capital

Contributed capital from stock issuance is recorded to account charter capital at par value.

Undistributed profit

Undistributed profit comprises of realized and unrealized profit.

- Unrealized profit of the period is the total differences between gain or loss arising from revaluation of FVTPL financial assets or other financial assets through profit and loss in the interim income statement.
- Realized profit during the period is the net difference between total revenue and income, and total expenses in the interim income statement of the Company, except for gain or loss arising from revaluation of financial assets recognized in unrealized profit.

Reserves

On 17 December 2021, the Ministry of Finance issued Circular 114/2021/TT-BTC to annul Circular No. 146/2014/TT-BTC of the Minister of Finance guiding the financial regime for public securities companies, fund management companies. Whereby:

- For the balance of the Capital Supplementary Reserve set up according to the provisions of Circular No. 146/2014/TT-BTC: used to supplement the charter capital according to current regulations;
- For the balance of the and Operational Risk and Financial Reserves set up according to the provisions of Circular No. 146/2014/TT-BTC: used to supplement charter capital or used under the decision of the General Meeting shareholders, the Board of members or the Chairman of the company in accordance with current regulations.

4.14 Appropriation of net profits

Net profit after tax is available for appropriation to shareholders based on approval by the Annual General Meeting Shareholders after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

4.15 Related parties:

Parties are considered to be related parties of the Company if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions, or when the Company and other parties are under common control or under common significant influence. Related parties can be enterprises or individuals, including close members of the family of any such individuals.
