- Pursuant to Circular No. 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance guiding information disclosure on the securities market;*
- Pursuant to the Q2/2025 Financial Statements dated July 18, 2025 of Hanoi Civil Construction Investment Joint Stock Company;*

The Company would like to provide the following explanation of figures in the Q2/2025 Business Results Report:

Unit: VND

Indicator	Q2/2025	Q2/2024	Increase (+) / Decrease (-)	Rate (%)
1. Revenue from sales and services	17,560,771,432	37,011,139,777	(19,450,368,345)	-53%
2. Deductions from revenue	-	-	-	-
3. Net revenue from sales and services (01-02)	17,560,771,432	37,011,139,777	(19,450,368,345)	-53%
4. Cost of goods sold	12,343,493,880	29,676,870,169	(17,333,376,289)	-58%
5. Gross profit from sales and services (10-11)	5,217,277,552	7,334,269,608	(2,116,992,056)	-29%
6. Financial income	3,380,065	89,159,709	(85,779,644)	-96%
7. Financial expenses	308,685,506	-	308,685,506	
of which: interest expenses	308,685,506	-	308,685,506	
8. Selling expenses	-	-	-	-

Indicator	Q2/2025	Q2/2024	Increase (+) / Decrease (-)	Rate (%)
9. General and administrative expenses	3,113,255,197	2,883,273,423	229,981,774	8%
10. Profit from operating activities	1,798,716,914	4,540,155,894	(2,741,438,980)	-60%
11. Other income	2,302,063,707	2,452,688,649	(150,624,942)	-6%
12. Other expenses	1,796,537,247	3,009,439,428	(1,212,902,181)	-40%
13. Other profit (31-32)	505,526,460	(556,750,779)	1,062,277,239	-191%
14. Total accounting profit before tax (30+40)	2,304,243,374	3,983,405,115	(1,679,161,741)	-42%
15. Corporate income tax expenses	479,732,400	1,242,135,427	(762,403,027)	-61%
16. Net profit after corporate income tax (50-51)	1,824,510,974	2,741,269,688	(916,758,714)	-33%

Explanation of the main causes of fluctuation:

- The **revenue and cost of goods sold** in the current period decreased compared to the same period last year mainly because most of the Company's construction and installation activities were completed and handed over by the end of 2024. This segment generally does not generate high profit margins and is mostly intended to maintain employment. Furthermore, the search for new work continues to face challenges with no significant positive signs, which directly impacted the above indicators.
- During the period, the Company borrowed capital from banks to focus resources on executing a project in Hai Phong, leading to the **incurrence of financial expenses**.

This is the Company's full explanation of the changes in the indicators in the Q2/2025 Financial Statements.

Respect!

- Construction and installation of equipment and machinery for projects;
- Real estate business, land use rights belonging to the owner, user, or leased;

The Company's headquarters: No. 292 Van Chuong Alley - Kham Thien - Dong Da - Hanoi.

4. Normal production and business cycle

The Company's normal production and business cycle is carried out over a period of more than 12 months.

II. Accounting period, currency used in accounting

1. Accounting period

The Company's accounting year follows the calendar year, starting from January 1 and ending on December 31 of

2. Currency used in accounting

The currency used in accounting is the Vietnamese dong ("VND"), recorded under the historical cost principle, in accordance with accounting standards, the accounting regime for Vietnamese enterprises, and related legal regulations concerning the preparation and presentation of financial reports.

III. Applicable accounting standards and regimes

1. Applicable accounting standards and regimes

The Company applies the Vietnamese accounting standards and the accounting regime for enterprises issued under Circular No. 200/2014/TT-BTC dated 22/12/2014 of the Ministry of Finance guiding the accounting regime for enterprises and Circular No. 53/2016/TT-BTC dated 21/03/2016 of the Ministry of Finance amending and supplementing certain provisions of Circular No. 200/2014/TT-BTC.

2. Declaration of compliance with accounting standards and regimes

The Company's financial reports are prepared and presented in compliance with the requirements of the current Vietnamese accounting standards and the Vietnamese enterprise accounting regime, as well as related legal regulations concerning the preparation and presentation of financial reports.

IV. Summary of main accounting policies

FINANCIAL REPORT EXPLANATION (continued)

(These explanations form an integral part and need to be read together with the accompanying financial report)

1. Accounting estimations

The preparation of financial reports complies with accounting standards, the Vietnamese corporate accounting regime and the related legal regulations on the preparation and presentation of financial statements require the Board of Directors to make estimates and assumptions that affect the reported numbers regarding debts, assets, and the presentation of debts and potential assets at the date of preparation of the financial statements, as well as the reported figures on revenue and expenses throughout the operating period. Although the accounting estimates are made with all understanding by the Board of Directors, the actual figures may differ from the estimates and assumptions set forth.

2. Principles for recognizing cash and cash equivalents

Cash and cash equivalents include the cash of funds, demand deposits, short-term investments, which are highly liquid, easily convertible to cash, and the associated risks of value fluctuations.

3. Accounting principles for financial investments

Investments held to maturity

Investments held to maturity include investments that the Company intends and has the ability to hold until maturity. Investments held to maturity include: time deposits at banks (including bills and promissory notes), bonds, mandatory redeemable preferred stock, and other investments held to maturity.

Investments held to maturity are recognized from the purchase date and initially valued at the purchase price and transaction costs related to the purchase of the investments. Interest income from investments held to maturity after the purchase date is recognized in the Income Statement on an accrued basis. Interest accrued before the Company holds it is deducted from the principal at the time of purchase.

Investments held to maturity are determined at cost less an allowance for doubtful accounts.

Investment in equity instruments of other entities

Investment in equity instruments of other entities reflects equity investments, but the Company does not have control, joint control, or significant influence over the investee.

Investments in equity instruments of other entities are initially recognized at cost, including the purchase price or contributed capital plus any directly related costs of the investment activity. Dividends and profits from periods prior to the investment being purchased are accounted for as a reduction of the value of that investment. Dividends and profits from periods after the investment is purchased are recognized as revenue. Dividends received in the form of shares are only tracked for the increase in the number of shares, not recognizing the value of the shares received at face value.

4. Accounting principles for receivables

Receivables are presented at book value minus allowances for doubtful accounts.

The classification of receivables is carried out according to the following principles:

- Trade receivables from customers reflect commercial receivables arising from transactions of a sale-purchase nature between the Company and buyers who are independent entities from the Company.
- Other receivables reflect receivables that are non-commercial and not related to sale-purchase transactions..

5. Principles for recognizing inventory

Inventory is determined based on the lower of cost and net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related costs incurred (if any) to obtain the inventory in its current location and condition.

FINANCIAL REPORT EXPLANATION (continued)

(These explanations form an integral part and need to be read together with the accompanying financial report)

Inventory is any property purchased or constructed for sale in the normal course of the Company's operations, not for rent or waiting for price increases determined based on the lower price between the cost to bring each product to its current location and condition and the realizable net value. The cost of inventory of real estate includes: the cost of land use and land development costs, construction costs payable to contractors, borrowing interest, design consulting costs, levelling costs, compensation for land clearance, consulting fees, land transfer taxes, general construction management costs, and other related costs.

The realizable net value is the estimated selling price of the inventory during normal production and business operations minus the estimated costs to complete and the estimated necessary costs for its consumption.

The value of inventory is calculated using the weighted average method and accounted for using the perpetual inventory method.

6. Principles of recognition and depreciation methods of fixed assets

6.1 Principles of recognition and depreciation methods of tangible fixed assets

Tangible fixed assets are recognized at historical cost, reflected in the balance sheet according to the criteria of historical cost, accumulated depreciation, and remaining value.

The historical cost of tangible fixed assets purchased includes the purchase price (excluding trade discounts or discounts), taxes, and direct costs related to putting the assets into a state ready for use.

The historical cost of self-constructed or self-made tangible fixed assets includes the actual cost of self-constructed or self-made tangible fixed assets and installation and trial run costs.

Costs incurred after the initial recognition of tangible fixed assets are added to the historical cost of the assets when these costs inevitably increase future economic benefits. Costs that do not meet the above conditions are recognized by the Company as production and business expenses in the period.

The Company applies the straight-line depreciation method for tangible fixed assets. Tangible fixed assets are classified by groups of assets with similar characteristics and purposes in the Company's production and business activities, including:

<i>Type of fixed assets</i>	<i>Depreciation period (years)</i>
Built structures	05 - 30
Machinery, equipment	03 - 10
Transportation vehicles, transmission equipment	05 - 10
Management tools, apparatus	03 - 05
Other assets	04 - 05

6.2 Principles of recognition and depreciation method for intangible fixed assets

Intangible fixed assets are recognized at historical cost, reflected in the balance sheet according to the indicators of historical cost, accumulated depreciation, and residual value.

The historical cost of intangible fixed assets includes all costs the Company incurs to acquire the fixed asset up to the point where the asset is ready for use. Costs related to intangible fixed assets arising after initial recognition are recorded as production and business expenses in the period unless these costs are associated with a specific intangible fixed asset and increase the economic benefits from these assets.

When a fixed asset is sold or liquidated, the historical cost and accumulated depreciation are removed, and any profit or loss arising from the liquidation is recorded as income or expense in the year.

7. Principles of recognition and depreciation method for investment real estate

Principles of recognition for investment real estate

FINANCIAL REPORT EXPLANATION (continued)

(These explanations form an integral part and need to be read together with the accompanying financial report)

The Company's investment real estate consists of land use rights, houses, parts of buildings, or infrastructure owned by the Company that is intended for profit from leasing. Investment real estate is presented at historical cost less accumulated depreciation. The historical cost of investment real estate includes all costs the Company incurs or the fair value of the amounts provided for exchange to acquire the investment real estate up to the date of purchase or completion of construction.

"Costs related to investment real estate incurred after initial recognition are recorded as expenses, unless these costs are likely to certainly result in the investment real estate generating more future economic benefits than initially assessed, in which case they are added to historical cost."

When investment real estate is sold, the historical cost and accumulated depreciation are removed and any profit or loss arising is accounted for as income or expense in the year.

The transfer from owned real estate for use or inventory to investment real estate occurs only when the owner ceases to use that asset and starts leasing it to others or when construction is completed. The transfer from investment real estate to owned real estate for use or inventory occurs only when the owner starts using the asset or starts implementing it for sale purposes. The transfer from investment real estate to owned real estate for use or inventory does not change the historical cost or residual value of the real estate at the date of transfer.

The depreciation method for investment real estate

The Company's investment real estate comprises rental infrastructure depreciated using the straight-line method over an estimated useful life ranging from 20 to 30 years.

8. Principles of recognition and allocation of prepaid expenses

Prepaid expenses include actual costs incurred but related to the production and business results of several accounting periods. The Company's prepaid expenses are corporate income tax provisions based on the revenue realization schedule and sales brokerage fees.

Corporate income tax provisions are recognized based on the amount of tax payable to the State Budget related to the provisional revenue collection schedule of the projects the Company is implementing. This amount will be recognized as current corporate income tax expense in the accounting period when the project is completed. The sales brokerage fee is all the expenses that the Company incurs to serve the activity of selling future apartments and is

Chi phí môi giới bán hàng là toàn bộ các khoản chi phí mà Công ty chi ra phục vụ cho hoạt động bán căn hộ hình thành trong tương lai và được phân bổ khi có doanh thu bán căn hộ.

9. Accounting principles for payables

Payables are amounts that must be paid to suppliers and other entities. Payables include amounts payable to sellers and other payables. Payables are not recorded lower than the obligation to pay.

The classification of payables is carried out according to the following principles:

- Payables to sellers include amounts payable arising from commercial transactions involving the purchase of goods, services, assets, and the seller is an independent entity from the buyer.
- Other payables include amounts payable that are non-commercial, unrelated to the purchase, sale, or provision of goods or services.

Payables are monitored in detail by each subject and payment term.

10. Principles for loan recognition

Loans are recognized based on receipts, bank documents, agreements, and loan contracts.

Loans are monitored by each subject and term.

11. Principles for recognizing accrued expenses

FINANCIAL REPORT EXPLANATION (continued)

(These explanations form an integral part and need to be read together with the accompanying financial report)

The Company's accrued expenses include provisions for project costs, actual expenses incurred during the reporting period but not yet paid due to the absence of invoices or complete accounting documentation, which are recorded in the production and business costs of the reporting period and accrued liabilities not yet incurred due to unrecognized goods, services but are anticipated in the production and business costs of this period to ensure that actual occurrence does not cause fluctuations in production and business expenses reflected as provisions for payables.

12. Principles for recognizing unearned revenue

The Company's unearned revenue includes advance rent for leased premises and advance revenue from real estate business.

The unearned revenue from real estate business is recognized based on the amount received according to the schedule specified in the Contract, for which invoices have been issued to customers purchasing homes.

Advance rental revenue is recognized for multiple accounting periods and customer payments according to the schedule specified in the Contract are recorded based on the amount received, with invoices issued. Revenue recognition is allocated based on the actual lease period of the contract.

13. Principles for recognizing equity

The owner's contributed capital is recorded based on the actual capital contributed by the shareholders.

Undistributed after-tax profits are the amount of profit (gain) from the Company's operations after deducting this year's corporate income tax expenses and adjustments due to retrospective application resulting from changes in accounting policies and retrospective adjustments due to significant errors from previous years.

After-tax profits from corporate income are distributed to shareholders after establishing funds according to the Company's Charter as well as legal regulations and have been approved by the Annual General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-cash items included in undistributed after-tax profits that may affect cash flow and the ability to pay dividends such as profits from the revaluation of contributed capital assets, profits from the revaluation of monetary items, and financial instruments classified as other non-cash items.

Dividends are recognized as payables when approved by the Annual General Meeting of Shareholders.

14. Principles and methods for recognizing revenue and income

The Company's revenue includes revenue from construction, revenue from leasing machinery, rent of premises, revenue from real estate transfer and revenue from bank interest:

The construction revenue of the Company is recognized according to the Company's accounting policy for

Construction revenue

When the results of the contract performance can be reliably estimated:

- For construction contracts that stipulate that the contractor is paid according to the planned schedule, the revenue and costs related to the contract are recognized corresponding to the part of the work completed as determined by the Company on the last day of the financial year.

- For construction contracts that specify that the contractor is paid according to the value of the completed quantities, the revenue and costs related to the contract are recognized corresponding to the part of the work completed as confirmed by the customer and reflected in the invoices issued.

Changes in the construction volume, compensation receipts, and other receipts are only recognized as revenue when they have been agreed upon with the customer.

When the results of the construction contract performance cannot be reliably estimated:

Sample number B 09 - DN

FINANCIAL REPORT EXPLANATION (continued)

(These explanations form an integral part and need to be read together with the accompanying financial report)

- Revenue is only recognized equal to the costs incurred for the contract that are relatively certain to be recoverable.
 - Costs related to the contract are only recognized as expenses when they have been incurred.
- The difference between the cumulative revenue of the recognized construction contract and the cumulative amount stated on the payment invoice according to the planned schedule of the contract is recognized as receivables or payables according to the planned schedule of construction contracts.

Real estate sales revenue

The real estate sales revenue of the Company as an investor is recognized when all five (5) of the following conditions are simultaneously satisfied:

- The real estate has been fully completed and handed over to the buyer, the enterprise has transferred the risks and benefits associated with ownership of the real estate to the buyer;
- The enterprise no longer holds management rights over the real estate as the owner or control rights over the real estate;
- Revenue can be reliably estimated;
- The Company has received or going to receive economic benefits from the real estate sale transaction;
- The costs related to the real estate sale transaction can be determined.

Interest revenue

Interest is recognized on an accrual basis, determined on the balances of deposit accounts and actual interest rates for each period.

15. Other accounting principles and methods

15.1 Tax obligations

Value Added Tax (VAT)

The Company applies the declaration and calculation of VAT according to the guidance of the current tax law.

Corporate Income Tax

The corporate income tax reflects the total value of the current tax payable.

The current tax payable is calculated based on taxable income for the year. Taxable income differs from net profit presented in the Income Statement because taxable income does not include income or expenses that are taxable or deductible in other years (including carryforward losses, if any) and also does not include non-taxable or non-deductible items.

The Company applies a corporate income tax rate of 20% on taxable profits.

The determination of the corporate income tax of the company is based on current tax regulations. However, these regulations change periodically and the final determination of corporate income tax depends on the results of inspections by the competent tax authority.

Other Taxes

Other types of taxes and fees that businesses are required to declare and pay to the local tax authorities according to the current tax laws in Vietnam.

According to the provisions of Vietnamese Accounting Standard No. 05 - Investment Property, the fair value of investment property as of 31/03/2025 needs to be presented. However, the Company has not yet determined this fair value, so the fair value of investment property as of 31/03/2025 has not been presented in the Notes to the financial statements. To determine this fair value, the Company will have to hire an independent consulting firm to assess the fair value of the investment property. Currently, the Company has not found a suitable consulting firm to carry out this task.
