NOTES TO THE FINANCIAL STATEMENTS

2nd Quarter 2025

1 . CHARACTERISTICS OF BUSINESS ACTIVITIES

Ownership Structure

Educational Book Joint Stock Company in Hanoi City was established according to Decision No. 1575/QĐ-BGD&DT-TCCB dated March 29, 2004, by the Ministry of Education and Training.

The company's headquarters are located at: 2nd Floor, D Office Block, Vinaconex 1, 289A Khat Duy Tien, Dai Mo Ward, Hanoi, Vietnam.

The company's charter capital is VND 102,194,840,000 (One hundred and two billion one hundred ninety-four million eight hundred forty thousand VND), equivalent to 10,219,484 shares.

Business Activities

According to Business Registration Certificate No. 0101493714 dated May 24, 2004, and its 13th amendment dated February 22, 2023, the company's business activities include:

- Trading educational books, other books, newspapers, magazines, maps, photographs, CDs, and other authorized publications;
- Trading stationery;
- Buying and selling machinery, equipment, and spare parts;
- Manufacturing and trading teaching equipment;
- Building houses and offices (only operating construction activities when meeting the legal capacity requirements);
- Building houses and offices (only operating construction activities when meeting the legal capacity requirements);
- Real estate business: Trading real estate, land use rights owned, used, or leased;
- Printing and related printing services;
- Education and training: Preschool education, primary education, lower and upper secondary education, vocational education, college, university, and postgraduate training (only after being permitted by competent State agencies); support services;
- Professional scientific and technological activities: Technology consulting, environmental consulting (excluding legal, financial, tax, auditing, accounting, securities consulting).

2 . ACCOUNTING REGULATIONS AND POLICIES APPLIED BY THE COMPANY

2.1 Accounting Period and Currency Used in Accounting

The company's fiscal year starts on January 1 and ends on December 31 each year.

The currency used in accounting records is the Vietnamese Dong (VND).

2.2 Accounting Standards and Policies Applied

Accounting Policies Applied

The company applies the Enterprise Accounting Standards issued according to Circular No. 200/2014/TT-BTC dated December 22, 2014, by the Ministry of Finance.

Declaration of Compliance with Accounting Standards and Policies

The company has applied Vietnamese Accounting Standards and guiding documents issued by the State. Financial statements are prepared and presented in accordance with all regulations of each standard, circulars guiding the implementation of standards, and the current accounting policies in force.

2.3 Principles for Recognizing Cash and Cash Equivalents

Cash includes cash on hand and demand deposits.

Cash equivalents are short-term investments with maturities not exceeding three months, highly liquid, easily convertible into known amounts of cash, and with insignificant risk of changes in value.

2.4 Financial Investments

Investments held to maturity include time deposits under fixed-term deposit contracts at Maritime Bank and loans held to maturity with the purpose of earning periodic interest.

The book value of investments in equity instruments of other entities without control, joint control, or significant influence is determined at cost.

For capital investments in other entities: Provision for impairment of investments is established at the end of the period based on the financial statements of the investee at the time of provision.

2.5 Accounts Receivable

S.D.K.K.N
★

Accounts receivable are monitored in detail according to the due dates, debtors, and other factors as per the company's management needs.

Provision for doubtful accounts is established for receivables that are overdue as per economic contracts, loan agreements, contractual commitments, or promissory notes, and for receivables that are not yet due but have low collectability. Specifically, the provision for overdue receivables is based on the expected loss or the principal repayment time as per the original sales contract, excluding any debt extensions between parties, and for receivables not yet due but the debtor has entered bankruptcy or is undergoing dissolution procedures, has disappeared, or fled.

2.6 Inventory

Inventory is measured at cost. If the net realizable value is lower than cost, inventory is measured at net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related costs incurred to bring inventory to its current location and condition.

Inventory is valued using the weighted average cost method.

The method for determining the value of work-in-progress at period end: the cost of work-in-progress is determined based on the value of materials issued and still held by subcontractors.

Inventory is accounted for using the periodic inventory system.

Provision for impairment of inventory is established at year-end as the difference between the cost of inventory and its net realizable value.

2.7 Principles for Recognizing and Depreciating Fixed Assets

Tangible fixed assets and intangible fixed assets are recognized at cost. During use, tangible and intangible fixed assets are recognized based on the original cost, accumulated depreciation, and residual value.

Depreciation is calculated using the straight-line method. The estimated useful lives are as follows:

▪ Buildings and Architectural Structures	50 years
▪ Machinery and Equipment	05 - 10 years
▪ Transportation Equipment	06 - 10 years
▪ Office Equipment	03 - 05 years
▪ Management Software	10 years

2.8 Business Cooperation Contracts (BCC)

Business Cooperation Contracts (BCC) are contractual agreements between two or more parties to jointly carry out economic activities without forming an independent legal entity. These activities may be jointly controlled by the contributing parties under a joint venture agreement or controlled by one of the participating parties.

Participating parties in the joint venture open detailed accounting books within their own accounting systems to record and reflect in their separate financial statements the following items:

- Capital portion into jointly controlled assets, classified by asset nature;
- Individual accounts payable arising from each contributing party;
- Income from the sale or use of product portions allocated from the joint venture along with cost allocations arising from the joint venture activities;
- Expenses related to joint venture capital contributions.

2.9 Prepaid Expenses

Prepaid expenses only related to the production and business costs of multiple accounting periods are recorded as prepaid expenses to be gradually allocated to the business results in subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses into business production costs each accounting period are based on the nature and extent of each type of expense to choose the appropriate allocation method and basis.

Draft costs are allocated to cost based on the quantity of books in stock and the time on the contract. If the allocation amount based on the time allocation method exceeds the allocation amount based on the quantity allocation method, the difference is recognized directly in the cost of goods sold.

Input VAT that cannot be deducted is allocated to the cost of goods sold based on the proportion between the value of non-taxable book types' stock outputs and the total value of non-taxable book types' beginning inventory plus the value of non-taxable book types' inventory imports during the period.

In accordance with current legal regulations, the contract for leasing the long-term office space at 2nd Floor, D Office Block, Vinaconex 1, 289A Khuat Duy Tien, Dai Mo Ward, Hanoi City, with a lease term of 44 years, is classified by the company as an operating lease contract. The value of prepaid rent is monitored under the long-term prepaid expense item and allocated according to the lease term.

Other prepaid expenses are gradually allocated to business production costs using the straight-line method.

2.10 Accrued Expenses

Accrued expenses for goods and services received from suppliers or provided to customers during the reporting period but not yet paid are recognized as production and business costs of the reporting period.

The recognition of accrued expenses into the production and business costs of the period is done according to the matching principle between revenues and costs incurred during the period. Accrued costs will be settled with actual costs incurred. The difference between the accrued amount and actual costs is reversed.

2.11 Owners' Equity

Owners' invested capital is recognized according to the actual capital contributed by the owners.

Share premium is recognized as the difference between the actual issue price and the nominal value of shares when first issued, additional issued, or treasury shares reissued. Direct costs related to additional issuance or reissuance of treasury shares are deducted from the share premium.

Treasury shares are shares issued by the company and subsequently repurchased. Treasury shares are recognized at actual value and presented on the Balance Sheet as a deduction from owners' equity. The company does not recognize gains (losses) when buying, selling, or issuing shares.

Retained earnings after tax not distributed are the profits from the company's activities after deducting adjustments due to retrospective application of changes in accounting policies and retrospective correction of material errors from previous years. Retained earnings after tax not distributed can be distributed to investors based on their capital contributions after approval by the Board of Directors and after reserving funds according to the company's charter and Vietnamese legal regulations.

Dividends payable to shareholders are recognized as liabilities on the company's Balance Sheet after the Board of Directors announces dividend distribution.

2.12 Revenues

Revenue from Sales

Revenue from sales is recognized when the following conditions are simultaneously met:

- Most of the risks and rewards associated with ownership of the product or goods have been transferred to the buyer;
- The company no longer holds managerial rights over the goods as an owner or has control over the goods;
- Revenue is measured with reasonable certainty;
- The company has received or will receive economic benefits from the sales transaction;
- The costs related to the sales transaction can be measured.

Revenue from Services

Revenue from services is recognized when the outcome of the transaction is determined reliably. In the case where service provision relates to multiple periods, revenue is recognized in the period based on the outcome of the completed portion of work as of the Balance Sheet date of that period. The outcome of the service provision transaction is determined when the following conditions are met:

- Revenue is measured with reasonable certainty;
- There is a probability of economic benefits being obtained from the service provision transaction;
- The completed portion of work is determined as of the Balance Sheet date;
- The costs incurred for the transaction and costs to complete the service provision transaction are determined.
- The completed portion of service provision work is determined using the work completed evaluation method.

Financial Activity Revenue

Revenue arising from interest, royalties, dividends, profit sharing, and other financial activity revenues are recognized when both of the following conditions are met:

- There is a probability of economic benefits being obtained from the transaction;
- Revenue is measured with reasonable certainty.
- Dividends and profit sharing are recognized when the company has the right to receive dividends or profits from capital contributions.

2.13 Cost of Goods Sold

The cost of goods sold during the period is recognized in accordance with the revenues generated during the period and complies with the prudence principle. Cases of material shortages exceeding the norm, costs exceeding normal levels, inventory losses after deducting the responsibility of relevant individuals or collectives, etc., are fully and timely recognized in the cost of goods sold during the period.

2.14 Corporate Income Tax

Current corporate income tax expense is determined based on taxable income for the period and the applicable corporate income tax rate for the current accounting period.

2.15 Related Parties

Related parties are considered related if the party has the ability to control or significantly influence the decision-making of the signatory regarding financial policies and activities. The company's related parties include:

- Enterprises directly or indirectly through one or more intermediaries that have the right to control the company or are controlled by the company, or jointly controlled with the company, including parent companies, subsidiaries, and affiliated companies;
- Individuals directly or indirectly holding voting rights of the company who significantly influence the company, key management personnel of the company, and close family members of these individuals;
- Enterprises where the above-mentioned individuals directly or indirectly hold significant voting rights or have a significant influence over the company.
