The Company applies the accounting method: Computer-based journal voucher.

**IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

**Estimates**

The preparation of financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year (reporting period). Although these accounting estimates are based on the management's best knowledge, actual results may differ from those estimates.

**Basis of consolidation**

The consolidated financial statements incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) up to 31 December each year. Control is achieved where the Company has the power to govern the financial and operating policies of an investee enterprise so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

Intragroup transactions and balances are eliminated in full on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business combination (see below) and the non-controlling interests' share of changes in equity since the date of the combination. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

**Business combinations**

On acquisition, the assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired is credited to profit and loss in the period of acquisition.

The non-controlling interests are initially measured at the non-controlling shareholders' proportion of the net fair value of the assets, liabilities and contingent liabilities recognised.

**NOTE TO THE FINANCIAL STATEMENTS****FORM B 09-DN****Investments in associates**

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting. Interests in associates are carried in the balance sheet at cost as adjusted by post-acquisition changes in the Company's share of the net assets of the associate. Losses of an associate in excess of the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate) are not recognised.

Where a group entity transacts with an associate of the Company, unrealised profits and losses are eliminated to the extent of the Company's interest in the relevant associate.

**Interests in joint ventures**

A jointly controlled entity is a joint venture which involves the establishment of a new entity in which each venturer has an interest. The entity operates through a contractual arrangement between the venturers which establishes joint control over the economic activity of the entity.

The Company reports its interests in jointly controlled entities using the equity method of accounting.

**Goodwill**

Goodwill represents the excess of the cost of acquisition over the Company's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition. Goodwill is amortised on the straight-line basis over its estimated period of benefit of 10 years (per VAS 11 - Business Combination, the maximum estimated useful life should not exceed 10 years).

Goodwill arising on the acquisition of associates and jointly controlled entities is included in the carrying amount of the associates and jointly controlled entities.

Goodwill arising on the acquisition of subsidiaries is presented separately as an asset in the consolidated balance sheet.

On disposal of a subsidiary, associate or jointly controlled entities, the attributable amount of unamortised goodwill is included in the determination of the profit or loss on disposal.

**Gain on bargain purchase**

Gain on bargain purchase represents the excess of the Company's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition over the cost of acquisition. Gain on bargain purchase is immediately recognised in the consolidated income statement at the acquisition date.

**Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand, demand deposits, cash in transit and short-term, highly liquid investments (not exceeding 3 months) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

**Financial investments***Held-to-maturity investments*

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits (commercial bills), bonds, preference shares which the issuer

**NOTE TO THE FINANCIAL STATEMENTS****FORM B 09-DN**

shall redeem at a certain date in the future, loans held to maturity to earn periodic interest and other held-to-maturity investments.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price plus directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the income statement on accrual basis. Pre-acquisition interest is deducted from the cost of such investments at the acquisition date.

Held-to-maturity investments are measured at cost less provision for impairment of held-to-maturity investments.

Provision for impairment of held-to-maturity investments is made in accordance with prevailing accounting regulations.

***Loan receivables***

Loan receivables are measured at cost less provision for doubtful debts. Provision for doubtful debts relating to loan receivables is made in accordance with prevailing accounting regulations.

**Equity investments in other entities**

Equity investments in other entities represent the Company's investments in ordinary shares of the entities over which the Company has no control, joint control, or significant influence.

Equity investments in other entities are carried at cost less provision for impairment.

**Receivables**

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

**Inventories**

Inventories are stated at the lower of cost and net realisable value. Cost comprises cost of purchases and other directly attributable expenses. The Company applies periodic method to account for inventories. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

**Tangible fixed assets and depreciation**

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

Buildings and structures	10–50
Machinery and equipment	05 –12
Office equipment	03 – 10
Motor vehicles	08– 12

### **Intangible assets and amortisation**

#### *Software*

Software are measured initially at purchase cost and are amortised on the straight-line basis over their estimated useful lives.

### **Prepayments**

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods, including land rentals, establishment costs and other types of long-term prepayments.

Establishment costs consist of expenses incurred in setting up the Company prior to obtainment of its Investment Certificate, which are expected to provide future economic benefit to the Company. Establishment costs, advertising expenditures and training costs incurred during the pre-operating stage are allocated to the income statement over a period of not exceeding three years from the date of operation commencement.

Other types of long-term prepayments comprise costs of small tools, supplies and spare parts issued for consumption (add significant items) which are expected to provide future economic benefits to the Company. These expenditures have been capitalised as long-term prepayments, and are allocated to the income statement using the straight-line method in accordance with the current prevailing accounting regulations.

### **Trade and other payables**

Account payables are monitored in details by payable terms, payable parties, original currency and other factors depending on the Company's managerial requirements. Accounts payable to suppliers include trade payables arising from transaction of buying-selling transactions and payables for import through entrustees (in import entrustment transactions).

Other payables include non-trade payables, not related to buying-selling transactions. Account payables are classified as short-term and long-term in the separate statement of financial position based on the remaining period of these payables at the reporting date.

Trade and other payables are stated at their costs. Trade and other payables classified as monetary items denominated in foreign currencies are revaluated at account transfer selling rate at the reporting date

### **Payable provisions**

Payable provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured at the management's best estimate of the expenditure required to settle the obligation as at the balance sheet date.

### **Unearned Revenue**

Unearned revenue is the amounts received in advance relating to results of operations of for multiple accounting periods for services or products that have been yet provided or delivered. The Company recognizes unearned revenue in proportion to its obligations that the Company will have to perform in the future. When the revenue recognition conditions are satisfied, unearned revenue will be recognized in the income statement for the year corresponding to the portion that meets the revenue recognition conditions.

### **Revenue recognition**

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

**NOTE TO THE FINANCIAL STATEMENTS****FORM B 09-DN**

- (a) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) the Company retains neither continuing managerial involvement to the degree usually associated with; ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

**Foreign currencies**

Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction date. The balances of monetary items denominated in foreign currencies as at the balance sheet date are retranslated at the exchange rates of commercial bank where the Company usually transacts on the same date. Exchange differences arising from the translation of these accounts are recognised in the income statement.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations (including comparatives) are translated to reporting currency using exchange rates prevailing on the balance sheet date. Income and expense items (including comparatives) are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are classified as equity and transferred to the Company's foreign exchange difference. Such translation differences are recognised in profit or loss in the period in which the foreign operation is disposed of.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

**Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

**NOTE TO THE FINANCIAL STATEMENTS**

**FORM B 09-DN**

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.
